**2. Levels of protection offered by the personal protective equipment**

Applicable Standards:

EN 149:2001+A1:2009 - "Respiratory protective devices - Filtering half masks to protect against particles - Requirements, testing, marking"

/

/

The protection equipment KZ-06

is compliant with the basic requirements provided by the standard(s) of reference for the particular fields of utilization the device is addressed to.

EN 149:2001+A1:2009 and /

Moreover, the protection equipment is in compliant with the specific requirements provided by the connected norm for the particular fields of use the device is addressed to:

/

Characteristics of the protection equipment are:

FFP2 NR

/

/

PPE description and notes:

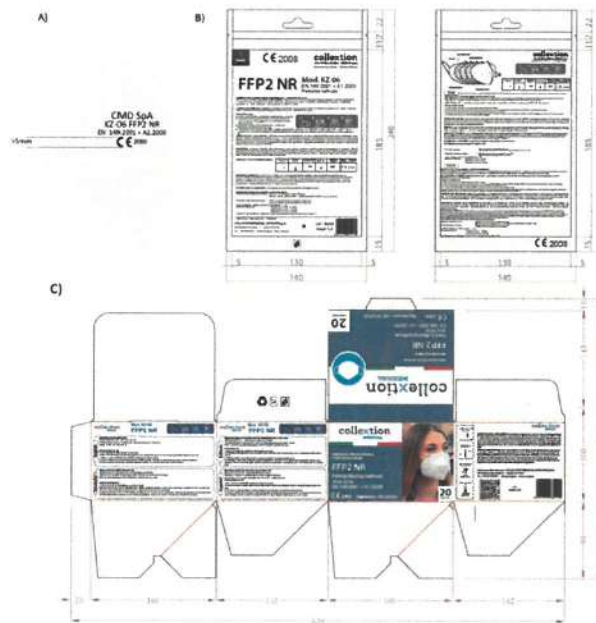

Valveless and disposable filtering half mask classified as FFP2 NR according to its filtering efficiency and its maximum total inward leakage. Filtering half masks are intended to provide adequate sealing on the face of the wearer against the ambient atmosphere when the skin is dry or moist and when the head is moved. This type of device covers the nose, the mouth and the chin of the user and consists entirely or substantially of filter material or comprises a facepiece in which the main filter(s) form an inseparable part of the device. Particle filtering half mask are designed to protect against both solid and liquid aerosols.

**3. Test results and test examinations are covered by the following test reports:**
